

SafeGuard ®

STAR

- 5-point protection
- Easy to install and use
- Fits current high- and low-back seats
- No lap belts required
- Designed and tested by the leader in child passenger safety

“A lot of people felt the restraints saved the children's lives. Our training on proper use and proper evacuation following an accident was also critical in the positive outcome.”

Judi Mitchell, Family Services/Transportation Manager with Blue Ridge Opportunity Commission Head Start (Wilkes County, North Carolina), explains the importance of the SafeGuard STAR in keeping children safe when a Head Start bus swerved to avoid an oncoming car and flipped over on Jan. 24, 2007. None of the six children in the bus were injured.

The most talked about add-on restraint for school buses, the SafeGuard STAR is truly the star of the industry. Versatile and convenient, the SafeGuard STAR saves you time and money while meeting the safety needs of every child in your care.

The Most Advanced Protection for your Child

SafeGuard

STAR

- The only add-on restraint system that can be installed three per standard 39" bus seat, helping to maintain seating capacity.
- 5-point restraint system easily adjusts to provide a proper, secure fit for children 25 to 65 lbs., up to 47" tall and over 1 year of age.
- Dual cam wrap system allows for simple, quick, and secure seat installation.
- Installs on both standard FMVSS 222 seats and FMVSS 210 seats.
- STAR stays secured to the bus seat, saving time and money, and eliminating the need for vests.
- Seat pad can be removed and washed without uninstalling the seat.
- Meets or exceeds all federal and Head Start safety standards.
- Optional storage bag has been designed to mount and store on the bus.
- Optional STAR *plus* features a larger base, comfort pad, and shoulder area to fit children 25 to 90 lbs. and up to 47" tall.
- Optional chest strap provides additional upper torso support and adjusts for a comfortable, secure fit.
