

SafeGuard Interchangeable BTI Seating - Exclusively for IC Bus™

Be ready for whatever the future holds with SafeGuard BTI, the best designed, easiest to maintain, and, most importantly, safest three-point seat available on the market.

SafeGuard BTI interchangeable seats are the only seats with exclusive SmartFrame® technology which offers compartmentalization for belted and un-belted passengers. No other seat manufacturer makes anything like it. Not even close.

Plus, the SafeGuard BTI is continually compliance tested to make sure it both meets and exceeds all federal safety standards.

All IC buses are 100% standard upgradeable.

SafeGuard®
BTI SEATING SYSTEM
NO MORE EXCUSES®

Save Time. Save More Money.

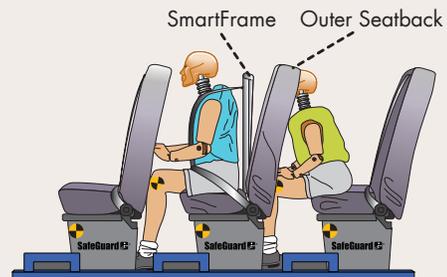

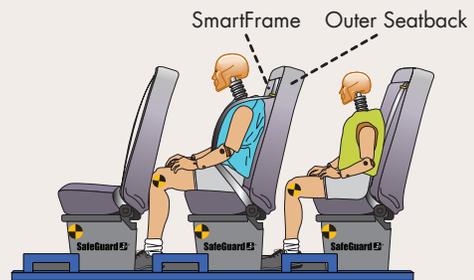

Seats are one of the most frequent elements replaced in a bus so it is important to have a seat that's seamless to replace, while providing the highest level of protection for riders. When you save time, you save money, and you'll save both only with the SafeGuard BTI.

We've engineered the only seat on the market that provides this and more. Simply undo four bolts. Swap backs. Tighten four bolts. Done. That's how easy it is to configure your school buses the way you want them with the SafeGuard BTI.

Smarter. Safer.
SafeGuard SmartFrame®

How it Works:

SafeGuard bus seats are made with two structures. The inner structure provides lap-shoulder belts and absorbs crash energy for the belted passenger. The outer seat back structure remains upright to cushion anyone in the seat behind who isn't wearing a seat belt.

IMMI reminds you to always buckle up.
