

FlexSeat - One size fits all.®

Heard that equipping a school bus with seat belts will make you lose capacity? Don't believe it. The SafeGuard FlexSeat® solved that issue years ago!

The SafeGuard FlexSeat safely transports three elementary school children or two high school students on a 39-inch seat, which is what a standard school bus seat is designed to do. Our seats are also continuously compliance tested to make sure you're getting the safest seat on the market.

- Easily use the same buses for elementary, middle, and high school routes.
- Maintains current un-belted seat rated capacity by offering belted seating for one, two or three students with proper fit and geometry.
- Contains SafeGuard's exclusive dual SmartFrame® technology to enhance compartmentalization and make transportation safer for belted and un-belted passengers. No other manufacturer has anything like it.
- Either two or three passenger lap-shoulder belt seats available in 26-, 30-, 36-, and 45-inch sizes.
- CAPE Tested to meet or exceed all government safety standards.

"The goal: A 3-point belt on Every bus for Every child." Mark Rosekind, NHTSA

The time has come for lap-shoulder belts on school buses, but where do school districts start? Field trips, school activities, and sporting events take school buses from quiet neighborhood streets to busy highways and interstates with speeds of 55 mph or more. With more risks should come more protection.

That's why your district's travel buses are the best place to begin with SafeGuard lap-shoulder belts.

As the Industry Leader,
We Define Safety.

What sets us apart:

SafeGuard is a brand of IMMI and the leading provider of 3-point seat belts, portable child restraints, and safety testing in the school bus industry. IMMI was the first to introduce 3-point lap-shoulder belts on school buses nearly two decades ago, and has been the most trusted manufacturer ever since. In addition to the school bus market, IMMI is the leading provider of safety systems in car seats, heavy trucks, fire apparatus, UTVs, construction equipment, and military. IMMI, based in Westfield, Indiana, is also home to the Center for Advanced Product Evaluation (CAPE), which has crash tested more school buses and school bus than anyone else in the world in a continuous effort to improve safety. IMMI operates facilities in North America, Asia, and Europe. It's 1,200-plus team members are dedicated every day to Bringing Safety to People®.

SafeGuard, CAPE and IMMI were featured on ABC's Good Morning America.

IMMI reminds you to always buckle up.
