## Integrated Child Seat - Helping to protect your smallest riders.

No more lugging child seats across the bus yard every day. SafeGuard's versatile Integrated Child Seat eliminates the need for add-on restraints or child seats for younger children. Available for school buses, the SafeGuard ICS® offers the security of a built-in child restraint system with a five-point harness for children 22 to 85 lbs.

- Thin seat design allows for no loss of seat rows.
- Sliding shoulder height adjusters enable ICS to accommodate children of a wider range of heights than can be restrained in other integrated child seats.
- Designed to avoid touch-related issues.
- Maintains full compartmentalization.
- Booster seat cushion with replaceable pad folds under itself for added comfort, elevation, and cleanliness.
- Easy access and service to restraint systems and upholstery.
- Contains SafeGuard's SmartFrame® technology.
- CAPE® tested to meet or exceed all federal and state safety standards.

SafeGuard  ICS® NO MORE EXCUSES®

“The goal: A 3-point belt on Every bus for Every child.” *Mark Rosekind, NHTSA*

The time has come for lap-shoulder belts on school buses, but where do school districts start? Field trips, school activities, and sporting events take school buses from quiet neighborhood streets to busy highways and interstates with speeds of 55 mph or more. With more risks should come more protection.

That’s why your district’s travel buses are the best place to begin with lap-shoulder belts.

## Special Protection for Special Needs.

### Upper Torso Control

IMMI, the world’s leading developer of child restraints offers the SafeGuard Upper Torso Control Device, a flexible transportation solution for students with special needs. Four attachment points give comfort and support for children (over 40 lbs.) and adults. It is purely a positioning device that must be used in conjunction with lap-shoulder seat belts for positioning and protection and should not be used alone.

- Detachable
- Easy to store
- Four points of adjustment for proper fit and enhanced comfort
- Designed to meet applicable FMVSS standards
- Designed for passengers over 40 lbs.

IMMI reminds you to always buckle up.
