

Suggested Generic Bid Language

Integrated Child Seats Only

Bidders shall provide pricing for two rows of integrated child seats on all buses. These seats shall be installed in the first two rows of the bus behind the driver. Each seat will have two (2) integrated seats for a total of eight (8). Seats must conform to FMVSS 213 requirements for child seats as well as all other applicable FMVSS requirements for school bus seats at the time of installation.

Integrated Child Seats and Seats with Lap-Shoulder Belts

Bidders shall provide pricing for all passenger seats to be equipped with integrated lap-shoulder belts. All seats (except Integrated Child Seats) shall offer flexible occupancy to maximize bus capacity. The first two (2) rows shall have integrated child seats for a total of eight (8) with two (2) fixed position lap-shoulder belts. Seats must conform to all applicable FMVSS requirements regarding lap-shoulder belt seating for school buses at the time of installation.

Seats with Lap-Shoulder Belts

Bidders shall provide pricing for all passenger seats to be equipped with integrated lap-shoulder belts. All seats shall offer flexible occupancy to maximize bus capacity. Seats must conform to all applicable FMVSS requirements regarding lap-shoulder belt seating for school buses at the time of installation.
