Instruction Manual

Failure to properly use this child restraint can result in serious injury or death. Please read and follow all child restraint and vehicle instructions carefully.

Mini-DVD discs are compatible in standard tray-loading DVD players. Do not use this DVD in a "slot-drive" DVD player. Consult your DVD player manual for specific compatibility.

If you do not have access to a tray-loading DVD player, standard-size DVD and video cassette instructions are also available free of charge by contacting SafeGuard Customer Service at www.safeguardgo.com (or) 1-800-586-7839.

Keep this manual in the storage location provided on the SafeGuard Go.
Congratulations on your purchase of a SafeGuard Go®, the premiere portable child restraint available today.

The SafeGuard team truly cares about child passenger safety and is committed to providing innovative child restraints that offer the utmost in safety and ease of use. While no child restraint can prevent injury in every situation, proper installation and use of a child restraint can substantially reduce a child’s risk of serious injury or death.

It is critical to read and understand these instructions and the instructions in the vehicle owner’s manual BEFORE using this child restraint. Failure to properly use this child restraint may result in serious injury or death of your child. If you have any questions after reviewing the instructions, please contact us at:

SafeGuard Customer Service: www.safeguardgo.com (or) 1-800-586-7839.

This child restraint system conforms to all applicable Federal motor vehicle safety standards. This restraint is NOT certified for aircraft use.

Video Instructions

Video instructions are also provided to help users fully understand how to use their SafeGuard Go. The DVD video instructions are included in the front pocket of this manual for your convenience. Mini-DVD discs are compatible in standard tray-loading DVD players. Do not use this DVD in a “slot-drive” DVD player. Consult your DVD player manual for specific compatibility.

If you do not have access to a tray-loading DVD player, standard-size DVD and video cassette instructions are also available free of charge by contacting SafeGuard Customer Service at www.safeguardgo.com (or) 1-800-586-7839.

Registration Information

Please fill out the prepaid registration card attached to the child restraint and mail it today (or) register online at the website listed below.

Child restraints could be recalled for safety reasons. You must register this restraint to be reached in a recall. Send your name, address, and the restraint’s model number, manufacturing date, and serial number to IMMI, 18881 U.S. 31 North, Westfield, IN 46074 (or) call 1-800-586-7839 (or) register online at www.safeguardgo.com/register.

For recall information, call the U.S. Government’s Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153), or go to http://www.NHTSA.gov.

For future reference, fill in the information below. The information can be found on the label on the bottom of the child restraint.

Warnings

⚠️ WARNING

FAILURE TO FOLLOW THESE WARNINGS CAN RESULT IN SERIOUS INJURY OR DEATH OF YOUR CHILD. PLEASE READ AND FOLLOW ALL CHILD RESTRAINT AND VEHICLE INSTRUCTIONS CAREFULLY.

- DO NOT INSTALL OR USE THIS CHILD RESTRAINT UNTIL YOU READ AND UNDERSTAND THE INSTRUCTIONS IN THIS MANUAL AND IN THE VEHICLE OWNER’S MANUAL. DO NOT let others install or use this child restraint unless they understand how to use it correctly.
- According to crash statistics, CHILDREN ARE SAFER WHEN PROPERLY RESTRAINED IN REAR VEHICLE SEATING POSITIONS, RATHER THAN FRONT SEATING POSITIONS.
- DO NOT PLACE ANY CHILD RESTRAINT IN THE FRONT SEAT OF A VEHICLE WITH AN ACTIVE PASSENGER AIR BAG UNLESS THE VEHICLE OWNER’S MANUAL SPECIFICALLY INDICATES IT IS ALLOWED. The back seat is the safest place for children under 13. FOR A VEHICLE WITH SIDE AIR BAGS, REFER TO THE VEHICLE OWNER’S MANUAL for child restraint installation instructions and precautions.
- INSTALL THIS CHILD RESTRAINT ONLY ON VEHICLE SEATS THAT FACE FORWARD. DO NOT install this child restraint on vehicle seats facing sideways or backwards.
- FOLLOW ALL THE INSTRUCTIONS on the child restraint and in this manual.
- ONLY USE THIS CHILD RESTRAINT FACING THE FRONT OF THE VEHICLE. DO NOT install rear-facing.

⚠️ WARNING

FAILURE TO FOLLOW THESE WARNINGS CAN RESULT IN SERIOUS INJURY OR DEATH OF YOUR CHILD. PLEASE READ AND FOLLOW ALL CHILD RESTRAINT AND VEHICLE INSTRUCTIONS CAREFULLY.

- ALWAYS SECURE THIS CHILD RESTRAINT WITH THE VEHICLE’S CHILD RESTRAINT ANCHORAGE SYSTEM (LATCH) IF AVAILABLE OR WITH THE VEHICLE SEAT BELT. A child restraint should be properly secured even when unoccupied. An unsecured child restraint can be thrown around and may injure occupants in a sharp turn, sudden stop or crash.
- NEVER LEAVE A CHILD UNATTENDED in this child restraint.
- REPLACE THIS CHILD RESTRAINT AFTER A CRASH. A crash can cause damage to the child restraint that you cannot see. Contact SafeGuard Customer Service for more information.
- DISCONTINUE USE OF THIS CHILD RESTRAINT seven years after manufacture date located on the bottom of the child restraint.
- DO NOT MODIFY THIS CHILD RESTRAINT or use any accessories or parts supplied by other manufacturers. DO NOT, except as allowed in this manual, attempt to disassemble any part of the child restraint or change the way the harness or vehicle seat belt are used.
- NEVER USE THIS CHILD RESTRAINT IF IT HAS DAMAGED OR MISSING PARTS. DO NOT use a cut, frayed or damaged harness, LATCH belt or vehicle seat belt.
- This restraint is NOT certified for aircraft use.
**Safe Practices**

- Ensure all vehicle occupants are properly restrained before traveling. Unrestrained occupants can be thrown around and may be seriously injured or seriously injure other occupants in a sharp turn, sudden stop or crash.
- Before every trip, check that the child restraint is secure and that the harness is properly adjusted around the child.
- If the child is wearing cold weather clothing, give extra attention to adjusting the harness. Make sure the harness straps lie flat on the child’s shoulders and the chest clip is at armpit level. Check to be sure harness is snugly adjusted and the child cannot lean forward. Clothing that interferes with the proper placement or adjustment of the harness system should never be used.
- Cover the child restraint when the vehicle is parked in direct sunlight. Parts of a child restraint can become very hot if left in the sun. Contact with these parts can burn a child’s skin. Always check the surface of any metal or plastic parts before putting your child in the child restraint.
- Do not leave loose objects, such as books, bags, etc., in the back of the vehicle. In the event of a sharp turn, sudden stop, or crash, loose objects can be thrown around and possibly cause serious injury to vehicle occupants.
- Do not allow children to play with vehicle seat belts. If possible, move unused seat belts out of reach to avoid a strangulation hazard.
- Always tightly roll or fold any excess tether strap and attach the hook and loop strip to avoid a strangulation hazard.

---

**Warning** cont’d.

**WARNING**

FAILURE TO FOLLOW THESE WARNINGS CAN RESULT IN SERIOUS INJURY OR DEATH OF YOUR CHILD. PLEASE READ AND FOLLOW ALL CHILD RESTRAINT AND VEHICLE INSTRUCTIONS CAREFULLY.

- Top of child’s ears must be below the top of the vehicle seat cushion or vehicle headrest. If the top of the child’s ears are above the top of the vehicle seat cushion or vehicle headrest, do NOT use the child restraint in this seating position.

**When used in the harness mode:**
- USE ONLY WITH CHILDREN WHO WEIGH BETWEEN 30 AND 60 POUNDS (13.6 - 27 KG) AND WHOSE HEIGHT IS BETWEEN 34 AND 52 INCHES (86 - 132 CM), AND WHO ARE OVER 1 YEAR OF AGE.
- ALWAYS SECURE THE TETHER STRAP provided with this child restraint. If a tether anchor is not available in your vehicle, do NOT use this restraint.
- SNUGLY ADJUST THE HARNESS provided with this child restraint around your child. An improperly adjusted harness may not sufficiently restrain the child in a crash resulting in serious injury or death.

**When used in the belt-positioning booster mode (without the harness):**
- USE ONLY WITH CHILDREN WHO WEIGH BETWEEN 40 AND 100 POUNDS (18 - 45 KG) AND WHOSE HEIGHT IS BETWEEN 43 AND 57 INCHES (109 - 145 CM), AND WHO ARE 3 YEARS OLD OR OLDER.
- USE ONLY THE VEHICLE LAP AND SHOULDER BELT SYSTEM when restraining the child in the booster seat. NEVER use a lap belt only.
Height And Weight Limitations

The child MUST meet ALL of the following requirements to use this child restraint.

Harness Mode:
- 30 - 60 pounds (13.6 - 27 kg)
- 34 - 52 inches (86 - 132 cm)
- Over 1 year old
  Note: Children in this range are approximately 2 to 8 years old.
- Harness height adjusters are at or just above child’s shoulders after proper adjustment
- Top of child’s ears are below top of vehicle seat cushion or vehicle headrest

Use of this child restraint with the harness is recommended for as long as the child meets all of the above requirements.

Booster Mode:
- 40 - 100 pounds (18 - 45 kg)
- 43 - 57 inches (109 - 145 cm)
- 3 years old or older
  Note: Children in this range are approximately 4 to 12 years old.
- Top of child’s ears are below top of vehicle seat cushion or vehicle headrest

Safe Practices cont’d.
- Do not leave folding vehicle seats unlatched. This can lead to serious injury in a sharp turn, sudden stop, or crash.
- Do not use anything to raise the child restraint off the vehicle seat. In a sharp turn, sudden stop, or crash, the child restraint could slide and potentially cause serious injury.
- Do not allow children to play with the child restraint.
- Never give this child restraint to someone else without also giving them this manual.
- Never use a second-hand child restraint with an unknown history.
**Harness Mode Features**

**Harness Mode**
- 30 - 60 pounds (13.6 - 27 kg)
- 34 - 52 inches (86 - 132 cm)
- Over 1 year old
- **MUST be used with top tether.**

**Booster Mode Features**

**Booster Mode**
- 40 - 100 pounds (18 - 45 kg)
- 43 - 57 inches (109 - 145 cm)
- 3 years old or older
- **MUST be used with lap-shoulder belt.**
- Installation instructions begin on page 51.
Vehicle Information

Vehicle Features

Important: Refer to your vehicle owner’s manual to identify your vehicle’s specific features and requirements for child restraint installation. Your vehicle’s features may be quite different from those shown below.

Vehicle Seat Requirements

WARNING

FAILURE TO FOLLOW THESE VEHICLE SEAT REQUIREMENTS CAN RESULT IN SERIOUS INJURY OR DEATH.

SOME SEATING POSITIONS IN YOUR VEHICLE MAY NOT BE ACCEPTABLE FOR THIS CHILD RESTRAINT. Some vehicles do not have any seating positions that can be used safely with a child restraint.
Vehicle Seat Requirements cont’d.

If you are not sure where to place the child restraint in your vehicle, consult your vehicle owner’s manual or call SafeGuard Customer Service at 1-800-586-7839.

- According to crash statistics, children are safer when properly restrained in rear vehicle seating positions, rather than front seating positions.
- The child restraint should not hang over the edge of the vehicle seat. At least 80% of the bottom of the child restraint should be in contact with the vehicle seat cushion.
- Install this child restraint only on vehicle seats that face forward. DO NOT install this child restraint on vehicle seats facing sideways or backwards.
- Only use vehicle seats with seat backs that lock in an upright position. Check that the seat back is locked.

LATCH Requirements

**WARNING**

FAILURE TO FOLLOW THESE LATCH REQUIREMENTS CAN RESULT IN SERIOUS INJURY OR DEATH.

SEE THE VEHICLE OWNER’S MANUAL FOR EXACT LOCATIONS AND REQUIREMENTS FOR USING LATCH WITH THIS CHILD RESTRAINT.

If you are unsure about how to identify or use the LATCH system, contact the vehicle manufacturer or call SafeGuard Customer Service at 1-800-586-7839.

LATCH (Lower Anchors and Tethers for CHildren) can be found in newer vehicles. Most new vehicles have two or more seating positions with LATCH anchorage systems. When used properly, the system holds the child restraint securely in place.

This child restraint requires the use of a top tether anchor when using the harness mode. IF a tether anchor is not available, DO NOT USE this child restraint.

LATCH consists of two parts: Lower anchors and tether anchors.
WARNING

FAILURE TO FOLLOW THESE VEHICLE SEAT BELT REQUIREMENTS CAN RESULT IN SERIOUS INJURY OR DEATH.

SOME VEHICLE SEAT BELT SYSTEMS ARE NOT ACCEPTABLE TO USE WITH THIS CHILD RESTRAINT.

Make sure you understand the seat belt systems in your vehicle. Carefully read this section on belt systems and also refer to the vehicle owner’s manual and any labels on the vehicle seat belts. If you are unsure whether the vehicle seat belts are acceptable to use, contact the vehicle manufacturer or call SafeGuard Customer Service at 1-800-586-7839.

Unacceptable Vehicle Seat Belt Systems

DO NOT USE ANY OF THE FOLLOWING SYSTEMS WITH THIS CHILD RESTRAINT.

• Lap belt with an emergency locking retractor (ELR)
  This type of lap belt stays loose and can move until it locks in a sudden stop or crash. This vehicle seat belt may NOT safely hold a child restraint in place. DO NOT USE this type of belt system unless the vehicle owner’s manual or label states the belt can be locked at all times.
  NEVER use a lap belt only when using the child restraint in a belt positioning booster mode.

Vehicle Seat Belt Requirements cont’d.

• The vehicle lower anchors may be visible at the vehicle seat bight (seat crease). If not visible, they may be marked with one of these symbols.

• The vehicle’s tether anchors may be visible. If not, they may be identified with this symbol.

• ONLY use LATCH on this child restraint in a seating position recommended by the vehicle manufacturer.

LATCH and the center-rear seating position: Do not use the inner lower LATCH anchors to install the child restraint in the center-rear seating position, unless:
- the vehicle owner’s manual specifically indicates it is allowed, AND
- the inner anchors are spaced between 11 and 20 inches (280 and 500mm) apart.

Never attach two LATCH connectors to one LATCH anchor.

When using the harness mode:
• Never use both the lower LATCH anchors and the vehicle seat belt system at the same time to install this child restraint.
• Always use the tether!

LATCH Requirements cont’d.

• The vehicle lower anchors may be visible at the vehicle seat bight (seat crease). If not visible, they may be marked with one of these symbols.

• The vehicle’s tether anchors may be visible. If not, they may be identified with this symbol.

• ONLY use LATCH on this child restraint in a seating position recommended by the vehicle manufacturer.

LATCH and the center-rear seating position: Do not use the inner lower LATCH anchors to install the child restraint in the center-rear seating position, unless:
- the vehicle owner’s manual specifically indicates it is allowed, AND
- the inner anchors are spaced between 11 and 20 inches (280 and 500mm) apart.

Never attach two LATCH connectors to one LATCH anchor.

When using the harness mode:
• Never use both the lower LATCH anchors and the vehicle seat belt system at the same time to install this child restraint.
• Always use the tether!
Unacceptable Vehicle Seat Belt Systems cont’d.

- **Lap belts forward of the seat bight (seat crease)**
  Some vehicle seat belt systems’ lap belts are anchored forward of the seat bight and come up through the vehicle seat’s bottom cushion. This vehicle seat belt may NOT safely hold a child restraint in place. DO NOT USE this type of belt system unless it holds the child restraint securely and the lap belt portion stays locked at all times.
  NEVER use a lap belt only when using the child restraint in a belt positioning booster mode.

- **Belt systems attached to the vehicle door or on a motorized track.**
  DO NOT USE vehicle seat belts that are attached to the door in any way or that move along a track to automatically surround the passenger when the door is closed. These vehicle seat belts WILL NOT safely hold a child restraint in place.

- **Combination lap-shoulder belt with two retractors**
  This type of belt system has a retractor for the shoulder portion and another retractor for the lap portion of the belt system. Both belt portions are sewn to the latch plate. This vehicle seat belt may NOT safely hold a child restraint in place. DO NOT USE this type of belt system with the harness unless the vehicle owner’s manual or label states the lap belt portion can be locked at all times.
  NOTE: This belt system may be used when using the child restraint as a belt positioning booster.

Acceptable Vehicle Seat Belt Systems

The following vehicle seat belt systems can be used with this child restraint if the seat location meets all other requirements of these instructions and those in the vehicle owner’s manual. If available, the LATCH attachments on this child restraint and the LATCH anchor points in the vehicle may be an option to use in place of the vehicle seat belt system when using the harness mode. Refer to the vehicle owner’s manual for LATCH locations and page 15-16 of this manual for more information.

- **Manually-adjusted lap belt**
  This type of lap belt is tightened by pulling on the excess belt once it is buckled. When adjusted properly, this belt system should hold the child restraint securely in place. Always check to make sure the seat belt is holding the child restraint securely.
  NEVER use a lap belt only when using the child restraint in a belt positioning booster mode.

- **Lap belt with automatic locking retractor (ALR)**
  This belt system’s retractor locks automatically and does not allow the lap belt to lengthen once it is buckled. When used properly, this belt system should hold the child restraint securely in place. The belt may need to be fed back into the retractor to remove the slack. Always check to make sure the seat belt is holding the child restraint securely.
  NEVER use a lap belt only when using the child restraint in a belt positioning booster mode.
Acceptable Vehicle Seat Belt Systems cont’d.

- **Combination lap-shoulder belt with locking latch plate**
  This type of belt system has a latch plate that will not allow the lap portion of the belt to loosen once it is buckled. When using harness mode, always check to make sure the seat belt is holding the child restraint securely.

- **Combination lap-shoulder belt with sliding latch plate**
  This type of belt system has a latch plate that allows the belt to slide through even when it is buckled. Many vehicles with this type of seat belt system can be locked by pulling all the seat belt webbing out. Refer to your vehicle owner’s manual for details. When using harness mode, always check to make sure the seat belt is holding the child restraint securely.

**Installation Of Harness Mode In Vehicle**

**WARNING**

FAILURE TO USE THIS CHILD RESTRAINT IN A MANNER APPROPRIATE FOR YOUR CHILD’S SIZE CAN RESULT IN SERIOUS INJURY OR DEATH.

- Instructions for the use of this child restraint differ depending on the size of your child. Be sure you are using the child restraint properly.
- Top of child’s ears must be below the top of the vehicle seat cushion or vehicle headrest. If the top of the child’s ears are above the top of the vehicle seat cushion or vehicle headrest, do NOT use the child restraint in this seating position.
- USE ONLY WITH CHILDREN WHO WEIGH BETWEEN 30 AND 60 POUNDS (13.6 - 27 KG) AND WHOSE HEIGHT IS BETWEEN 34 AND 52 INCHES (86 - 132 CM), AND WHO ARE OVER 1 YEAR OF AGE.
- ALWAYS SECURE THE TETHER STRAP provided with this child restraint. If a tether anchor is not available in your vehicle, do NOT use this restraint.
- SNUGLY ADJUST THE HARNESS provided with this child restraint around your child. An improperly adjusted harness may not sufficiently restrain the child in a crash resulting in serious injury or death.
Installation Of Harness Mode In Vehicle

Use this child restraint FORWARD FACING ONLY. Harness mode MUST be used with the tether.

HARNESS MODE
30 - 60 pounds (13.6 - 27 kg)
34 - 52 inches (86 - 132 cm)

BOOSTER MODE
40 - 100 pounds (18 - 45 kg)
43 - 57 inches (109 - 145 cm)

Installation With LATCH
(30-60 LBS., 34-52”)

WARNING
FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR DEATH.

- Use this child restraint FORWARD FACING ONLY.
- ALWAYS USE THE TETHER. THE HARNESS MODE CAN NOT BE USED WITHOUT THE TETHER.
- Never attach two LATCH connectors to one LATCH anchor.
- Use LATCH only in seating positions approved by the vehicle manufacturer.
- Read and follow all instructions in the child restraint instruction manual and the vehicle owner’s manual. In the case of a discrepancy, follow the instructions in the vehicle owner’s manual.
- See pages 15-16 for important LATCH requirements.

1. Choose an appropriate vehicle seat and verify a tether anchor and lower LATCH anchors are available. A
- Refer to vehicle owner’s manual to determine the exact LATCH anchor locations.
- IF a tether anchor is not available, DO NOT USE this child restraint. Use of the tether is required with the harness mode.
Installation With LATCH cont’d.

- IF a tether anchor is available but lower LATCH anchors are NOT available, the child restraint must be installed with a vehicle seat belt. (See page 29.)

2. Position the child restraint loosely against the vehicle seat facing forward.

3. Remove one LATCH connector from its storage location on the side of the child restraint. Push LATCH adjuster button and pull strap to lengthen the lower LATCH strap.

4. Attach LATCH connector to vehicle lower anchor. Listen for an audible click when the connector is attached. Check to be sure LATCH strap is not twisted and LATCH connector is attached properly.

5. Repeat steps 3 and 4 with the second LATCH connector.

6. Tightly secure the base of the child restraint:
   - Pull one LATCH strap while firmly pushing child restraint down into vehicle seat as shown. E
   - Repeat with the second LATCH strap.
   - Place knee in child restraint while pulling LATCH straps if needed to achieve secure attachment.

7. Prepare the tether:
   Tether use is required. The harness can NOT be used without the tether.
   - To lengthen tether, push tether adjuster button and pull tether strap as shown. F
   - Movable Vehicle Headrest:
     ALWAYS route the tether straps UNDER the vehicle headrest. If the tether straps cannot be routed UNDER the adjustable vehicle headrest, do NOT use the child restraint in this seating position. Route the tether straps between the vehicle headrest posts if possible. G1
   - Fixed Vehicle Headrest:
     Route the tether straps around or over the vehicle headrest. G2 or G3

See page 13 for important vehicle headrest information.
8. Secure the tether:
   • Secure the tether clip to the vehicle tether anchor. [H]
   • Pull free end of tether strap to tighten and remove any slack. [I]
   • Check to be sure tether is tight & secure.
   • Tightly roll or fold excess tether strap, attach the hook and loop strip, and place out of the child’s reach to avoid a strangulation hazard. [J]

9. Check for a secure installation:
   • Grasp child restraint at rear of arms as illustrated. Pull forward and side-to-side on the child restraint. [K]
   • The installation is secure if the child restraint does not move more than 1 inch in any direction.
   • If the child restraint does not remain securely attached, repeat steps 1-9 or move the child restraint to another seating location.
   • If possible, move unused vehicle seat belts out of the child’s reach to avoid a strangulation hazard.
   • Check for a secure installation before every use of the child restraint!

After installation is complete, see page 44, Securing Child in Harness.
Removal:

- To remove the tether, press the tether adjuster button and loosen the tether strap. **L** Depress the snap and remove the hook from the vehicle tether anchor. **M**
- Roll or fold excess tether strap and attach hook and loop strip to prevent tangling.
- To detach LATCH connectors from the vehicle lower LATCH anchors, press the red button on each LATCH connector. **N** Return LATCH connectors to storage locations on side of child restraint.
- Fold harness for storage. **O**

---

**Installation With Vehicle Seat Belts**

(30-60 Pounds, 34” - 52”)

**WARNING**

FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR DEATH.

- Use this child restraint FORWARD FACING ONLY.
- This child restraint requires the use of the tether. IF a tether anchor is not available, DO NOT USE this child restraint.
- Read and follow all instructions in the child restraint instruction manual and the vehicle owner’s manual. In the case of a discrepancy, follow the instructions in the vehicle owner’s manual.
- See pages 17-20 for important vehicle seat belt requirements.
- Always store LATCH connectors in their storage location on side of child restraint when not in use.

**Installation With LATCH** cont’d.

**Installation With Lap-Shoulder Belt**

1. Choose an appropriate vehicle seat and verify a tether anchor is available. **A**

   - Refer to vehicle owner’s manual to determine the exact tether anchor location.
   - If a tether anchor is not available, do NOT USE this child restraint.
2. Position the folded child restraint on the vehicle seat facing forward. Locate vehicle belt attachment loops on back of child restraint as shown. B

3. Route ONLY the lap portion of the vehicle seat belt forward of one armrest as shown. C

4. Thread lap-shoulder belt through both vehicle belt attachment loops. D1
   Be sure vehicle belt is routed as shown. D2

5. Route lap-shoulder belt forward of second armrest as shown. E
   Then buckle vehicle seat belt.

6. Tighten the vehicle seat belt:
   - Remove any twists from the vehicle belt.
   - Push child restraint firmly into vehicle seat by placing knee on child restraint.
   - Grasp shoulder portion of belt near vehicle belt buckle and pull to tighten lap belt portion of belt. F
   - Grasp shoulder portion of belt near center of vehicle seat back and pull up until child restraint is tightly secured. G

**Important Note:** If vehicle is equipped with a locking seat belt, pull all the webbing out to engage lock mechanism during this step. Refer to vehicle owner’s manual and any labels on the vehicle seat belts for details.
7. Position harness loosely against vehicle seat. 

8. Prepare the tether:
   Tether use is required. The harness can NOT be used without the tether.
   • To lengthen tether, push tether adjuster button and pull tether strap as shown.
   • Movable Vehicle Headrest:
     ALWAYS route the tether straps UNDER the vehicle headrest. If the tether straps cannot be routed UNDER the adjustable vehicle headrest, do NOT use the child restraint in this seating position. Route the tether straps between the vehicle headrest posts if possible.
   • Fixed Vehicle Headrest:
     Route the tether straps around or over the vehicle headrest.
     See page 13 for important vehicle headrest information.

9. Secure the tether.
   • Secure the tether hook to the vehicle tether anchor.
   • Pull free end of tether strap to tighten and remove any slack.
   • Check to be sure tether is tight & secure.
   • Tightly roll or fold excess tether strap, attach the hook and loop strip, and place out of the child’s reach to avoid a strangulation hazard.

10. Check for secure installation.
    • Grasp child restraint at rear of arms as illustrated. Pull forward and side-to-side on the child restraint.
    • The installation is secure if the child restraint does not move more than 1 inch in any direction.
• If the child restraint does not remain securely attached, repeat steps 1-10 or move the child restraint to another seating location.
• If possible, move unused vehicle seat belts out of the child’s reach to avoid a strangulation hazard.
• Check for a secure installation before every use of the child restraint!

Removal:
• To remove the tether, press the tether adjuster button and loosen the tether strap. O Depress the snap and remove the hook from the vehicle tether anchor. P
• Roll or fold excess tether strap and attach hook and loop strip to prevent tangling.
• Fold harness to access vehicle belt. Unbuckle vehicle seat belt and remove from vehicle belt attachment loops. Q

After installation is complete, see page 44, Securing Child in Harness.

Installation With Vehicle Seat Belts
(30 - 60 Pounds, 34" - 52")

WARNING
FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR DEATH.
• Use this child restraint FORWARD FACING ONLY.
• This child restraint requires the use of the tether. IF a tether anchor is not available, DO NOT USE this child restraint.
• Read and follow all instructions in the child restraint instruction manual and the vehicle owner’s manual. In the case of a discrepancy, follow the instructions in the vehicle owner’s manual.
• See pages 17-20 for important vehicle seat belt requirements.
• Always store LATCH connectors in their storage location on side of child restraint when not in use.

Installation With Lap Only Belt
1. Choose an appropriate vehicle seat and verify a tether anchor is available. A
   • Refer to vehicle owner’s manual to determine the exact tether anchor location.
   • If a tether anchor is not available, do NOT use this child restraint.
**Lap Only** cont’d.

2. Position the folded child restraint on the vehicle seat facing forward. Locate vehicle belt attachment loops on back of child restraint as shown. 

3. Route the lap belt forward of one armrest as shown. 

4. Thread lap belt through both vehicle belt attachment loops. 

5. Route lap belt forward of second armrest as shown. Then buckle vehicle seat belt. 

6. Tighten the vehicle seat belt: 
   - Remove any twists from the vehicle belt. 
   - Push child restraint firmly into vehicle seat by placing knee on child restraint. 
   - Manually adjusted: Pull the free end of the seat belt to tightly secure the child restraint. 
   - Automatic locking retractor (ALR): Pull seat belt to remove any slack and “feed” seat belt back into the retractor to tightly secure the child restraint. 

**Important Note:** Refer to pages 17-20 for additional vehicle seat belt information.
**Lap Only** cont’d.

7. Position harness loosely against vehicle seat. [H]

8. Prepare the tether:

   Tether use is required. The harness can NOT be used without the tether.
   • To lengthen tether, push tether adjuster button and pull tether strap as shown. [I]
   • Movable Vehicle Headrest:
     ALWAYS route the tether straps UNDER the vehicle headrest. If the tether straps cannot be routed UNDER the adjustable vehicle headrest, do NOT use the child restraint in this seating position. Route the tether straps between the vehicle headrest posts if possible. [J1]
   • Fixed Vehicle Headrest:
     Route the tether straps around or over the vehicle headrest. [J2] or [J3]

   See page 13 for important vehicle headrest information.

9. Secure the tether:
   • Secure the tether hook to the vehicle tether anchor. [K]
   • Pull free end of tether strap to tighten and remove any slack. [L]
   • Check to be sure tether is tight & secure.
   • Tightly roll or fold excess tether strap, attach the hook and loop strip, and place out of the child’s reach to avoid a strangulation hazard. [M]
10. Check for a secure installation:
- Grasp child restraint at rear of arms as illustrated. Pull forward and side-to-side on the child restraint. N
- The installation is secure if the child restraint does not move more than 1 inch in any direction.
- If the child restraint does not remain securely attached, repeat steps 1-10 or move the child restraint to another seating location.
- If possible, move unused vehicle seat belts out of the child’s reach to avoid a strangulation hazard.
- Check for a secure installation before every use of the child restraint!

After installation is complete, see page 44, Securing Child in Harness.

Removal:
- To remove the tether, press the tether adjuster button and loosen the tether strap. O
  Depress the snap and remove the hook from the vehicle tether anchor. P
- Roll or fold excess tether strap and attach hook and loop strip to prevent tangling.
- Fold harness to access vehicle belt. Unbuckle vehicle seat belt and remove from vehicle belt attachment loops. Q
Headrest Removal & Installation

Remove Headrest:
- Fold child restraint so back of the harness faces up. **A**
- Grasp webbing located on back of headrest and push down through I-shaped opening in headrest. **B**
- Repeat with second I-shaped opening.
- Remove headrest and store in travel bag for future use.

Reinstall Headrest:
- Fold child restraint so back of the harness faces up.
- Place headrest on back of child restraint facing down with I-shaped openings centered on exposed webbing. **C**
- Grasp webbing and pull up through I-shaped opening. **D** Be sure to pull both plies of webbing through openings.
- Repeat with second I-shaped opening.
- Check to be sure webbing lies flat against the back of the headrest.

Head Pillow Installation

- Use the hook and loop fastener to attach the two top straps to one another. **A** Adjust height of pillow by attaching straps to one another at different points.
- Position the pillow straps behind the tether straps to hold pillow in place as shown. **B**
Securing Child In Harness

**WARNING**

FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR DEATH.

- Make sure harness is adjusted snugly before every use of the child restraint.
- Avoid bulky clothing that can interfere with harness fit.
- Always secure the top tether strap. If a tether anchor is not available, do NOT use this child restraint.

1. Prepare harness:
   - Move harness height adjuster to uppermost position by squeezing adjuster together in center. **A**
     Repeat with second harness height adjuster.
   - Loosen harness: Push left harness adjuster button and pull up on left shoulder strap. **B**
     Repeat with right shoulder strap.

2. Place child in restraint: **E**
   - Place child in child restraint with child’s back flat against the back of the child restraint.
   - Remove any twists from harness straps.
   - Position harness shoulder straps over child’s shoulders.

- Open chest clip by squeezing middle tabs and pulling apart. **C**
- Unbuckle harness buckle by pressing down on red release button. **D**
3. Adjust harness height:
   - Position each harness height adjuster at or just above child’s shoulder. **F**
   **NOTE:** To position adjuster, squeeze center of adjuster together and move up or down.

4. Buckle harness:
   - Use buckle pull loop to pull buckle & buckle pad away from child.
   - Make sure harness straps are not twisted.
   - Insert buckle tongues into harness buckle. Listen for an audible click when each buckle tongue is fastened. **G**
   - Check buckle connection is secure by pulling on shoulder straps.

5. Tighten harness:
   - Pull free end of harness strap, located on the outside of child’s leg, until harness is snug around the child. **H**
   - Repeat with second harness strap.

6. Fasten harness chest clip: **I**
   - Fasten chest clip by pushing both sides together
   - Position chest clip at middle of child’s chest, at armpit level.

7. If using removable headrest, slide headrest up or down to a comfortable position for the child. **J**

8. Adjust vehicle headrest: **K**
   - Adjust the vehicle headrest so the top of the headrest is closest to the top of the child’s head.
   - Top of child’s ears must be below top of the vehicle headrest.

- A snug strap should not allow any slack. It lies in a relatively straight line without sagging. It does not press on the child’s flesh or push the child’s body into an unnatural position.
- Be sure the harness is snug and tight on both the thighs and chest before each use.
Securing Child cont’d.

- If vehicle is not equipped with a headrest, the top of the child’s ears must be below the top of the vehicle seat cushion. L

To remove child from the child restraint:
- Open chest clip by squeezing middle tabs and pulling apart M
- Loosen harness: Pull shoulder strap up while pushing button on harness adjuster located on outside of child’s leg. Repeat with second harness strap. N

- Use buckle pull loop to pull buckle and buckle pad away from child. Unbuckle harness buckle by pressing down on red release button. O
- Remove child.
- Rebuckle harness to prevent twisting of the straps. P
Checklist for Proper Harness Use

Read complete instructions prior to using the child restraint!

Harness Mode
30 - 60 pounds (13.6 - 27 kg)
34 - 52 inches (86 - 132 cm)

1. Child weighs 30 - 60 pounds (13.6 - 27 kg), is 34 - 52 inches (86 - 132 cm) tall, and is over 1 year old.

2. Tether attachment is secure and tight. NEVER use the harness without the tether.

3. Child restraint is securely installed and cannot move more than 1 inch in any direction at the base of the armrests.

4. Tops of child’s ears are below top of vehicle seat cushion or vehicle headrest.

5. Harness height adjusters are at or just above child’s shoulders.

6. Chest clip is securely fastened and adjusted to armpit level.

7. Harness buckle connection is secure.

8. Harness is snug and tight on child’s thighs and chest.

Questions?
Please contact SafeGuard Customer Service: www.safeguardgo.com or 1-800-586-7839. For assistance locating the nearest child restraint inspection station, you may contact the National Highway Traffic Safety Administration: 1-888-327-4236 (TTY: 1-800-424-9153), or go to http://www.NHTSA.gov.

Belt-Positioning Booster Mode
(40-100 LBS., 43-57”)

WARNING
FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR DEATH.

- Use only with children who weigh between 40 and 100 pounds (18 - 45 kg) and whose height is between 43 and 57 inches (109 - 145 cm), and who are 3 years old or older.

- Use only the vehicle lap and shoulder belt system when restraining the child in the booster seat. NEVER use a lap belt only.

- Secure this child restraint with the vehicle’s child restraint anchorage system (lower LATCH anchors) if available.

- Instructions for use of this child restraint differ depending on the size of your child. Be sure you are using the child restraint properly.

- Use of this child restraint with the harness is recommended for as long as the child meets all of the requirements listed on page 9 of this manual. When your child is over 60 lbs. (27 kg) or 52” (132 cm), the harness must be removed and the child restraint converted to a belt-positioning booster.

- Top of child’s ears must be below the top of the vehicle seat cushion or vehicle headrest. If the top of the child’s ears are above the top of the vehicle seat cushion or vehicle headrest, do NOT use the child restraint in this seating position.
Belt-Positioning Booster Mode

(40-100 LBS., 43-57”)

Use this child restraint FORWARD FACING ONLY. Booster mode must be used with lap-shoulder belt.

Belt-Positioning Booster Mode

1. Buckle harness and fasten chest clip to prevent tangling.
2. With bottom of child restraint facing up, use flathead screwdriver to loosen five harness brackets. A1 & A2

IMPORTANT NOTE: NEVER remove LATCH brackets. (The brackets are labeled “LATCH” on the bottom of the child restraint.)

3. Remove two vehicle belt loops from two rear harness brackets as shown. B & C
4. Pull two vehicle belt loops up through top of seat cover as shown.  

5. With bottom of child restraint facing up, grasp harness bracket as shown and push through seat base.  

   Repeat with four additional harness brackets including harness buckle bracket.  

6. Remove harness including buckle and buckle pad.  

7. Store harness and cover assembly together in clean, dry location (preferably in original box or travel bag).  

8. Attach shoulder belt positioner.  
   - Insert loop end of strap through rear harness bracket opening in seat base.  
   - Pass the clamp end of the strap through the loop end and pull clamp end up.  

   IMPORTANT NOTE: The shoulder belt positioner must be attached to the opening in the seat base on the side closest to where the shoulder belt contacts the child’s shoulder.  
   - To remove vehicle shoulder belt positioner, reverse steps above.  

After conversion is complete, see page 56, Installation of Booster Mode in Vehicle.
**Installation of Booster Mode in Vehicle**

**WARNING**

FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR DEATH.

- Use this child restraint FORWARD FACING ONLY.
- Never attach two LATCH connectors to one LATCH anchor.
- Use LATCH only in seating positions approved by the vehicle manufacturer.
- See pages 15-16 for important LATCH requirements.

**Installation with LATCH**

1. Choose an appropriate vehicle seat and verify lower LATCH anchors are available. A
   - Refer to vehicle owner’s manual to determine the exact lower LATCH anchor locations.
   - If lower LATCH anchors are NOT available, go to page 59, Installation Without LATCH.

2. Position the child restraint facing forward on the vehicle seat with the back flat against the vehicle seat back. B

3. Remove one LATCH connector from its storage location on the side of the child restraint. Push LATCH adjuster button and pull strap to lengthen the lower LATCH strap. C

4. Attach LATCH connector to vehicle lower anchor. D Listen for an audible click when the connector is attached.
   Check to be sure LATCH strap is not twisted and LATCH connector is attached properly.

5. Repeat steps 3 & 4 for second LATCH connector.
Installation With LATCH cont’d.

6. Tightly secure the base of the child restraint:
   • Pull one LATCH strap while firmly pushing child restraint down into vehicle seat as shown. E Repeat with the second LATCH strap.
   • Place knee in child restraint while pulling LATCH straps if needed to achieve secure attachment.

7. Check for a secure installation:
   • Grasp child restraint at rear of arms as illustrated. Pull forward and side-to-side. F
   • The installation is secure if the child restraint does not move more than 1 inch in any direction.
   • If the child restraint does not remain securely attached, repeat steps 1-7 or move the child restraint to another seating location.

Removal:
   • To detach LATCH connectors from vehicle lower LATCH anchors, press the red button on each connector. G
   • Return LATCH connectors to storage locations on side of child restraint.

Installation Without LATCH

1. If lower LATCH anchors are not available, store LATCH connectors in their storage location on side of child restraint.

2. Position the child restraint facing forward on the vehicle seat with the back flat against the vehicle seat back. A

After installation is complete, see page 60, Securing Child in Booster.
Securing Child in Booster

**WARNING**

FAILURE TO FOLLOW ALL INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR DEATH.

- Use only the vehicle lap and shoulder belt system when restraining the child in the booster seat.
- NEVER use a lap belt only.
- Top of child’s ears must be below the top of the vehicle seat cushion or vehicle headrest. If the top of the child’s ears are above the top of the vehicle seat cushion or vehicle headrest, do NOT use the child restraint in this seating position.

1. Place child in the restraint.
   - Place child in booster with child’s back flat against the back of the vehicle seat.
   - Do not allow child to slouch.

2. Make sure vehicle belt is not twisted.

3. Route lap portion of lap-shoulder belt under both child restraint armrests. Shoulder portion should go under armrest on buckle side only. A

4. Buckle vehicle seat belt.

5. Attach shoulder belt positioner. B
   - Open shoulder belt positioner.
   - Place on shoulder portion of vehicle seat belt.
   - Snap closed.

**IMPORTANT NOTE:** The shoulder belt positioner must be attached to the seat base on the side closest to where the shoulder belt contacts the child’s shoulder.

See page 55 for complete installation instructions.

6. Adjust height of shoulder belt positioner to just above child’s shoulder.
   - Pull free end of webbing on shoulder belt positioner to shorten. C (or) tilt plastic adjuster to lengthen.
   - Adjust until vehicle shoulder belt lies across the middle of the child’s shoulder. D
7. Pull up on shoulder portion of vehicle belt to tighten lap portion.  

8. Make sure belts are snug and lie flat against child. Lap portion must be low and snug on thighs. Shoulder portion must be snug and across the chest and middle of child’s shoulder.  

9. After child is tall enough for vehicle shoulder belt to rest properly on child’s shoulder without shoulder belt positioner, remove shoulder belt positioner from child restraint. See page 55 for instructions.  

NEVER use a lap belt only.  

---  

### Checklist for Proper Booster Use

Read complete instructions prior to using the child restraint!

- **Booster Mode**  
  - 40 - 100 pounds (18 - 45 kg)  
  - 43 - 57 inches (109 - 145 cm)  

- **1** Child weighs 40 – 100 pounds (18 - 45 kg), is 43-57 inches (109 - 145 cm) tall, and is 3 years old or older.  
- **2** IF installed with LATCH: Child restraint is securely installed and cannot move more than 1 inch in any direction at the base of the armrests.  
  IF installed without LATCH: LATCH connectors are stored in storage locations on side of child restraint.  
- **3** Tops of child’s ears are below top of vehicle cushion or vehicle headrest.  
- **4** Child is restrained with vehicle lap-shoulder belt. NEVER use lap belt only.  
- **5** Lap portion of belt is routed under both armrests and shoulder portion is routed under armrest on buckle side.  
- **6** Lap portion of belt is positioned on child’s thighs and shoulder portion is centered on child’s shoulder.  
- **7** Vehicle buckle connection is secure.  
- **8** Belts are snug on child’s thighs and chest.  

### Questions?  

Please contact SafeGuard Customer Service: www.safeguardgo.com or 1-800-586-7839. For assistance locating the nearest child restraint inspection station, you may contact the National Highway Traffic Safety Administration: 1-888-327-4236 (TTY: 1-800-424-9153), or go to http://www.NHTSA.gov.
Additional Information

Instructions
Storage
After carefully reading and following these instructions, store the instruction manual in one of its two storage locations.

• When using the harness, store the manual in the pocket located on the back of the harness cover. A

• When using the booster without the harness, store the manual in its storage location on the bottom of the child restraint. B

Transporting The Child Restraint

• Use the convenient travel bag to transport your child restraint.

• Simply fold the harness, place in travel bag, zip and go!

Storing The Child Restraint

• Store the child restraint in its travel bag and/or in the original box.

• Keep in a cool, dry area.

• Do not place any heavy objects on top of it.

Aircraft Use

This child restraint system conforms to all applicable Federal motor vehicle safety standards. This restraint is NOT certified for use in aircraft.

• Use of the harness requires a top tether anchor, which is NOT available on aircraft.

• Use of the booster (without the harness) requires a lap-shoulder belt system, which is NOT available on aircraft.

Other Uses

• This child restraint is certified only for use in motor vehicles.

• Do not use in recreational vehicles (RVs), boats, golf carts, airplanes, or any other non-approved application.

• Do not allow children to play with this child restraint.
Care And Cleaning

Seat Cover Care
To clean the seat cover, first try to spot clean with mild soap and water. If
spot cleaning is inadequate or the entire cover requires cleaning, follow the
instructions below to remove the cover.

Cover Removal
Please note the harness DOES NOT need to be removed to remove the cover(s).

Headrest Cover Removal
1. Remove headrest. (See page 42.)
2. Lift elastic and remove headrest covers.

Harness Cover Removal
1. Open chest clip.
2. Unbuckle harness.
3. Open hook and loop attachments on back of cover. A
4. Detach flaps from top and bottom of cover.
5. Remove the harness cover.

Seat Cover Removal
1. Unbuckle harness.
2. Remove buckle pad from seat cover.
3. Detach elastic straps from seat base as shown. B
4. Open hook and loop attachments on each side of cover.
5. Remove cover from armrests.
6. Route harness buckle through cover.
7. Remove the seat cover.

Cleaning the Cover
- Remove instruction manual from storage pocket.
- Machine wash separately in cold water on delicate cycle.
- Line dry. DO NOT machine dry as it may result in excessive shrinkage and the cover may not fit the child restraint properly.
- DO NOT use bleach or abrasive detergents.

Cover Installation

Reinstall Seat Cover
1. Open hook and loop attachments on each side of seat cover.
2. Position armrest covers over each armrest.
3. Route harness buckle through cover.
4. Position front of cover on front of seat base.
5. Thread buckle through elastic strap on buckle pad.
6. Tuck ends of buckle pad into seat cover.
7. Route harness adjusters through cover as shown. A
8. Position center rear portion of seat cover under the harness cross strap as shown. B
9. Close hook and loop attachments on sides of seat cover.

10. Secure elastic straps to seat base as shown. [C]

**Reinstall Harness Cover**

1. Open chest clip.

2. Unbuckle harness.

3. Place harness buckle tongues under armrests to ease installation of cover.

4. Insert top flap of harness cover through bottom slot in tether bracket & secure to hook and loop on back of cover. [D]

5. With back of harness cover facing you, insert bottom flap of harness cover under harness cross strap as shown. [E]

6. Open hook and loop closure on back of harness cover.

7. Secure bottom flap of harness cover to hook and loop on back of cover.

8. Position plastic harness belt sleeves within harness cover. [F]

9. Fasten hook and loop closure on back of harness cover.

10. With front of harness cover facing you, lift one height adjuster and place top of harness cover under adjuster. [G]

11. Repeat with second height adjuster.

12. Close chest clip.

DO NOT use the child restraint without the cover.
**Buckle And Harness Care**

**Cleaning buckle and harness:**
- The harness buckle may be cleaned with a damp cloth. *NEVER LUBRICATE THE BUCKLE.*
- The harness straps may be wiped clean with warm water and mild soap and then allowed to air dry. *DO NOT immerse the harness in water.*
- If harness straps cannot be wiped clean, a new harness assembly may be ordered.
- *DO NOT use any harsh detergents, chemicals or bleach.*
- *DO NOT iron the harness straps.*

**Reinstall Harness**

**WARNING**

FAILURE TO FOLLOW THESE HARNESS REINSTALLATION INSTRUCTIONS MAY RESULT IN SERIOUS INJURY OR DEATH.

**Re-Install Harness**

1. Remove buckled harness assembly from its storage location. Orient harness so that buckle is facing up or toward you.

2. Install harness buckle bracket by pushing bracket completely through top of cover and seat base.  
   
   **Tip:** Grasp bracket on bottom of child restraint to help pull through seat base.

3. Thread buckle through elastic strap on buckle pad and tuck buckle pad into seat cover. Unbuckle harness and move buckle tongues aside.

4. Install two rear harness brackets: 
   
   - Open hook and loop attachments on each side of seat cover.
   - Grasp bracket as shown & push completely through opening in top of seat base.
   - Repeat with second rear bracket.
   
   **Tip:** Grasp bracket on bottom of child restraint to help pull through seat base.

5. Route two vehicle belt attachment loops through opening in top of seat base.  
   
   **Grasp each vehicle belt attachment loop on bottom of child restraint and pull completely through seat base.**

6. With bottom of child restraint facing up, route vehicle belt attachment loops through two rear harness brackets as shown.
7. Fasten harness buckle to ensure harness straps are not twisted.

8. Install two forward harness brackets:
   - Grasp bracket & push completely through opening in top of seat base.
   - Repeat with second bracket.
   Tip: Grasp bracket on bottom of child restraint to help pull through seat base.

9. Snap all five harness brackets in place. Be sure each bracket is securely attached.

Questions?
Please contact SafeGuard Customer Service for assistance at www.safeguardgo.com or 1-800-586-7839.

Replacement Parts

Replacement parts may be ordered online at www.safeguardgo.com or by contacting SafeGuard Customer Service at 1-800-586-7839. The product model number and date of manufacture are required to order replacement parts. This information can be found on the label on the bottom of the child restraint. Use SafeGuard replacement parts only. The following replacement parts are available.

Instruction Manual with DVD (free replacement)
Complete Cover Assembly (includes seat cover w/buckle pad, harness cover, headrest covers)
Seat Cover w/Buckle Pad
Foam Seat Pad
Vehicle Shoulder Belt Positioner
Headrest Assembly
Travel bag
Head Pillow
Crash Exchange Program

If your SafeGuard Go was involved in a vehicle crash, please contact SafeGuard customer service at 1-800-586-7839 or go to www.safeguardgo.com/exchangeprogram to see if you qualify for a new seat under our Crash Exchange Program.

Warranty

GO LIMITED WARRANTY
Indiana Mills & Manufacturing, Inc. (IMMI) provides the following limited warranty on its SafeGuard Go. Completing and mailing the owner registration card within thirty (30 days) of purchase will expedite the processing of any future warranty claim.

LIMITED WARRANTY
IMMI warrants that the SafeGuard Go’s hardware components (buckles, adjusters, booster base, etc.) and the fabric will be free from defects in material and workmanship for one (1) year from the date of purchase. The exclusive remedy of this warranty shall be replacement of the SafeGuard Go. IMMI reserves the right to discontinue or change parts, fabrics, models, or products, or to substitute with a comparable model or product. IMMI will ship replacement product to you without charge.

WARRANTY LIMITATIONS
This warranty shall not apply to damages resulting from normal wear and tear, product misuse, misapplication, neglect (including but not limited to improper storage), modification, accident, improper installation or use not in accordance with product instructions.

LIMITATIONS OF WARRANTIES AND DAMAGES
The warranty and remedies as set forth above are exclusive and in lieu of all others, oral or written, express or implied. In no event will IMMI be liable for any damages, including incidental or consequential damages, arising out of the use or inability to use the SafeGuard Go. It is expressly agreed that the liability of IMMI for any damages arising out of or related to this transaction, or the use of IMMI’s products, whether in contract or in tort, is limited to the replacement of the SafeGuard Go by IMMI.

To the extent permitted by applicable law, IMMI makes no warranties; either express (except as provided herein) or implied, and expressly disclaims any implied warranty of merchantability or fitness for a particular purpose. Some states do not allow exclusion of implied warranties, limitations on how long an implied warranty lasts, or the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you. IMMI does not authorize any person to create for it any other warranty, obligation, or liability in connection with the SafeGuard Go.

MAKING A CLAIM UNDER THIS LIMITED WARRANTY
All warranty claims and product returns must be made within the warranty period and must be submitted to IMMI within ten (10) days of discovery of the alleged defect or other problem, or the claim shall be deemed waived. To make a claim under this warranty, please contact the SafeGuard Help Desk at 1-800-586-7839.

A SafeGuard representative will qualify your claim and upon confirmation will issue you a warranty identification number. Upon receiving this number, please ship the SafeGuard Go, clearly marked with the warranty identification number, to IMMI at the following address for inspection and evaluation:

IMMI Warranty
18881 US 31 North
Westfield, IN 46074
**Warranty cont’d.**

You have two options to consider:  

**Option A)** A replacement SafeGuard Go can be immediately sent to you. Your credit card will be charged for the replacement at a discounted price, plus freight. IMMI representatives will inspect and evaluate the returned SafeGuard Go within 14 days of receipt. Upon confirmation of warranty claim, your credit card will be credited for the amount previously charged for the replacement.

If the warranty claim is denied and the product is safe to use, the seat will be returned. You will not be able to return the replacement seat previously sent. If the warranty claim is denied and the seat is unsafe to use, it will not be returned. You will not be able to return the replacement seat previously sent.

**Option B)** You may request that we do not ship a replacement seat until you receive confirmation that warranty claim will be approved. IMMI representatives will inspect and evaluate the returned SafeGuard Go within 14 days of receipt. If the warranty claim is denied and the seat is safe to use, the seat will be returned. If the warranty claim is denied and the product is unsafe to use, it will not be returned. You may purchase a new SafeGuard Go at a discounted price, plus freight.

If thirty (30) days have elapsed after the receipt of warranty claim and we have not received the SafeGuard Go, the claim will be denied on the basis of non-receipt of the product in question and no refund will be given for the charge of the replacement.

**PARTS INSPECTION**

Products supplied by IMMI are certified to applicable federal standards and must have every part returned to IMMI for inspection. Each SafeGuard Go must be clearly marked with the warranty identification number so that it can be matched up with the specific warranty claim involved.

**REPLACEMENT POLICY**

There are absolutely no provisions for field repairs or replacement(s) of SafeGuard Go’s components. (Replacement fabric covers and instruction booklets may be purchased at www.safeguardgo.com.) The complete SafeGuard Go must be returned to IMMI for evaluation, and a complete SafeGuard Go will be sent as a replacement.
